What quotes stood out to you

I googled
"mathematician".

What do you notice
about the pictures?

It is important
that you are
able to visualize
yourself as a
mathematician!

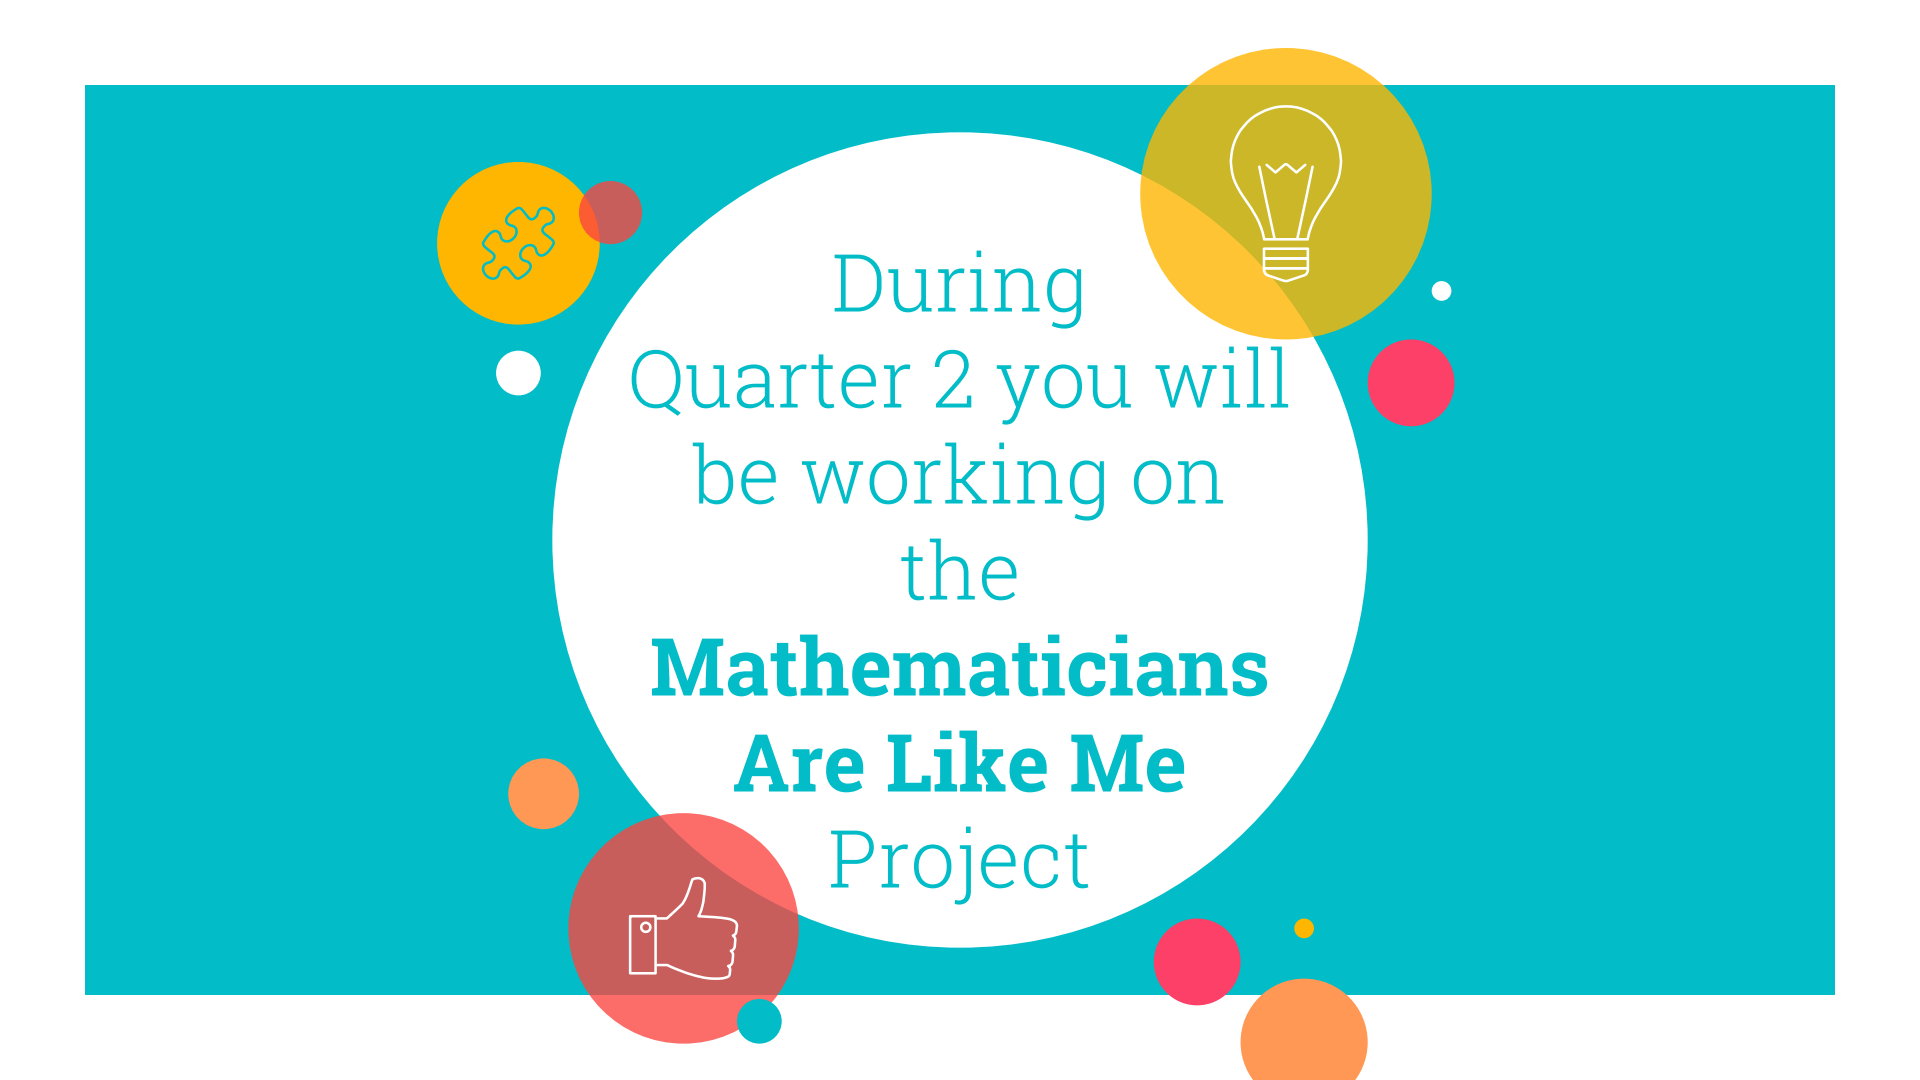

It is also important that your classmates and community can imagine themselves as mathematicians!

A person's hands are shown writing on a document with a pencil. The background is a blurred image of a person in a white lab coat. A large teal circle is centered over the image, containing the text "Mathematicians Are Like Me". Surrounding the teal circle are several smaller circles of various colors (orange, red, yellow, white) containing icons: a puzzle piece, a lightbulb, and a thumbs up gesture.

Mathematicians
Are Like Me

During
Quarter 2 you will
be working on
the
**Mathematicians
Are Like Me**
Project

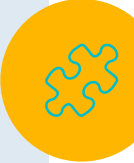

This project has
two parts...

Part One:

Research a
mathematician that
reminds you of yourself
and create a poster.

Part Two:

With a group of
classmates, create a
product that will help
people in the community
realize that
mathematicians are like
them.

The goal of the project is for us to spread the message to as many people in our community as we can!

Let's look at the rubric, found on Google Classroom
